

Théo BAUTISTA

7 rue Auguste et André Rouzée, 95330 Domont

thoba.dev@proton.me - 06 52 41 60 11

<https://www.linkedin.com/in/théo-bautista>

Drivers licence - Car owner

3rd year student - Embedded Systems Engineer

Searching for an IT internship abroad - Early 2026 (16 weeks)

Professional experience

Developer | Avistel - Carrières-Sur-Seine (France, 78)

MAY 2024 - AUGUST 2024

Development of a scanning system to detect television in a room :

- **Detection via Arduino** : Scan via BLE (Bluetooth Low Energy) devices and collect device data (Name, mac address, RSSI power) and calculate distance from Arduino board.
- **TCP server communication** : Creation of a small TCP server in C++ language for data communication between the Arduino (client) and the C++ (server) via JSON file.
- **Use of results in a database** : Creation of a MySQL database to use the results.

Proximity Technician | Malakoff Humanis - Malakoff (France, 92)

JUNE 2022 - AUGUST 2022

Solving employee IT problems :

- **Network rollout** : Opening the network on a branch of the building to welcome new employees and resolve any problems not detected during rollout.
- **Equipment responsibilities** : Installation and configuration of computer workstations in response to user needs
- **Network patching** : Intervention and problem-solving in the company's various patching rooms, redesign of network architecture to ensure infrastructure maintainability.

Measurement and Test Technician | Bombardier - La Pocatière (Canada, QC)

MARCH 2019 - MAY 2019

Application of test protocols in an S&D context :

- **Work on induction brakes** : Testing, data acquisition and calibration of a more powerful braking system that costs less over time.
- **Redesign of an air-conditioning system** : Participation in a study group on the evolution of a wagon-scale air-conditioning architecture.

School Career

Embedded Systems Engineer | Université Paris Diderot (Paris)
ONGOING

Bachelor Game Programming | Quest Education Group (Puteaux)
2024

DUT Physical Measurements | Université Paris 13 (Saint-Denis)
2019

Technical Skills

- Frequent use of **Git** and **Github**
- Ability to **adapt** and **quick learning**
- Mastery of languages **C**, **C++**, **Bash**, **Java** and **Arduino**
- Learnt synchronous language **Heptagon (SCADE fork)**
- Development in **C#/.NET** as well as **Unity 2D, 3D** and **VR**
- Development **C/C++** on **Unreal Engine 5**, **Cocos2DX** and **SFML**. Creation of a custom engine with **Vulkan** library
- **Java** development on mini-projects: exclusive use of **JDK**
- Strong self-taught knowledge of **Python**, **SQL** and the **Web (HTML, CSS, JavaScript)**

Languages and hobbies

- **English** : TOEIC (790/990 - July 2019)
- **Spanish** : B1
- **Portuguese** : Comprehension
- Videogames
- Sports (Tennis, Judo)
- Travelling
